

INTERNATIONAL SEARCH REPORT

International Application No.

PCT/EP2004/002367

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 C08G65/00 C11D1/722

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC 7 C11D C08G

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	WO 99/18929 A (CONNOR DANIEL STEDMAN ; VINSON PHILLIP KYLE (US); COFFINDAFFER TIMOTHY) 22 April 1999 (1999-04-22) page 22, line 19 - page 23, line 5 Page 26 lines 24-37 (Fischer -Tropsch alcohols, "SASOL", compare present examples)	1-13

☒ Further documents are listed in the continuation of box C.

☒ Patent family members are listed in annex.

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *Z* document member of the same patent family

Date of the actual completion of the international search

NOTIFICATION OF TRANSMITTAL OF
THE INTERNATIONAL PRELIMINARY
EXAMINATION REPORT

(PCT Rule 71.1)

Date of mailing
(day/month/year)

04.07.2006

Applicant's or agent's file reference
D-04002 PCT

IMPORTANT NOTIFICATION

International application No.
PCT/EP2004/002367

International filing date (day/month/year)
08.03.2004

Priority date (day/month/year)
08.03.2004

Applicant
SASOL GERMANY GMBH et al.

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

Applicant SASOL GERMANY GMBH et al.		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.
2. This REPORT consists of a total of 4 sheets, including this cover sheet.
- ☒ This report is also accompanied by ANNEXES, i.e. sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).
- These annexes consist of a total of 2 sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the opinion
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☐ Certain defects in the international application
- VIII ☐ Certain observations on the international application

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

IAP5 Rec'd PCT/PTO 30 AUG 2006
International application No. PCT/EP 2004/002557

I. Basis of the report

1. With regard to the elements of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17):*

Description, Pages

1-6, 8-15 as originally filed
7 received on 08.02.2006 with letter of 08.02.2006

Claims, Numbers

2(part), 3-15 as originally filed
1, 2(part) received on 08.02.2006 with letter of 08.02.2006

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:
- ☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

Independent claims

Product claim 1 relates to mixed alcohol block alkoxylates of formula (V) comprising linear and branched hydrophobic parts R.

Use claim 14 relates to the use of the mixed alcohol block alkoxylates (V) as low-foaming, foam-suppressing and anti-foam surfactants.

Use claim 15 relates to the use of the mixed alcohol block alkoxylates (V) in detergents and cleaners.

Novelty

Claims 1, 14 and 15 are novel.

None of D1-D4 describes mixed alcohol block alkoxylates (V) according to claim 1.

Therefore, claims 1, 14 and 15 are novel.

Inventive step

Claims 1, 14 and 15 involve an inventive step.

Closest prior art is D2 or D3. The present mixed alcohol block alkoxylates (V) comprising linear and branched hydrophobic parts R show low-foaming, high biodegradability and improved wetting when used in detergents and cleaners (see present examples). Such a performance is surprising and could not be derived from the prior art. Therefore, claims 1, 14 and 15 involve an inventive step.

Industrial applicability

The claimed subject-matter is industrially applicable.

R^1 , R^2 , x , y and z in general formula V:

are defined as follows:

- 5 R^1 and R^2 are independent of one another and optionally different for each z , selected from the group consisting of:
H and linear aliphatic C1 to C3 hydrocarbons and preferably are methyl and/or ethyl with the proviso that R^1 and R^2 are not the same for one z ,
10 x and y are independent of one another and optionally different for each z values from 1 to 10, preferably with the proviso that at least one x or y is equal to or greater than 2 and more preferably 2 to 10, and
 z has a value of from 1 to 5.

- 15 Further wherein R^1 is H, x preferably falls in the range from 1 to 10, more preferably in the range 1 to 6, with R^2 methyl, ethyl or propyl and y preferably in the range from 1 to 10, more preferably in the range 1 to 6. z is preferably in the range 1 to 2, more preferably 1.

- 20 Alternatively when R^1 is methyl, ethyl or propyl, x preferably falls in the range from 1 to 10, more preferably in the range 2 to 6, with R^2 equals H and y preferably in the range from 1 to 10, more preferably in the range 2 to 6. z is preferably in the range 1 to 2, more preferably 1.

- 25 The non-ionic surfactant having the general formula (V) can be prepared with known techniques, for example by reacting an alcohol R-OH with ethylene oxide and propylene oxide or butylene oxide, alternating blocks of the former with blocks of the latter, in the presence of a base catalyst selected from the hydroxides of alkaline or earth-alkaline metals or from mixed oxides of magnesium-zinc, magnesium-tin, magnesium-titanium or magnesium-antimony, or acids like H_2SO_4 , or Lewis acids like $TiCl_4$. Also
30 catalysts based on a mixture of calcium hydroxide, dispersed in an alcohol ethoxylate medium, partially neutralized with 2-ethylhexanoic acid and sulfuric acid and also catalysts based on a mixture of calcium hydroxide, dispersed in an alcohol ethoxylate medium, partially neutralized with 2-phenylhexanoic acid and sulfuric acid and mixed with aluminium alkoxide, can be used. More preferred are the catalysts KOH, NaOH,

Claims

1. Composition comprising alcohol alkoxylates of the general formula (V).

5 wherein the residue RO is derivable from a mixture of alcohols ROH, being essentially primary alcohols, essentially consisting of

(a) from more than 20 to 80 % by mass of alcohols that are linear and aliphatic and comprise 8 to 20 carbon atoms,

10 (b) from more than 10 to 80 % by mass of alcohols that are aliphatic and comprise 8 to 20 carbon atoms, and
 - 1, 2 or 3 carbon atoms are tertiary carbon atoms whereas
 - none of the two carbon atoms in the 1 or 2 position relative to the OH group is a tertiary carbon atom and

15 (c) up to 25 % by mass of alcohols are different to (a) and (b) and comprise 8 to 20 carbon atoms,

wherein for all alcohols according to (a), (b) and (c)

- at least 80 % of the tertiary carbon atoms related to the total of all tertiary carbon atoms in the alcohol mixture are not directly adjacent,

20 - the alcohols according to (a), (b) and (c) supplement one another essentially to 100 % by mass and

wherein for the alcohols (b) and (c) that may comprise alkyl branching

- at least 80 % of the alkyl branches are methyl and/or ethyl and

25 R^1 and R^2 are independent of one another and optionally different for each z, selected from the group consisting of

H and linear aliphatic C1 to C3 hydrocarbons with the proviso that R^1 and R^2 are not the same for one z,

x and y have independent of one another and optionally different for each z values from 2 to 10 and

30 z has a value of from 1 to 5.

2. Composition according to claim 1 wherein

x is from 2 to 6,

y is from 2 to 6,

z is from 1 to 2, preferably 1, and
